

ABSTRACT

5 Disclosed herein are topical compositions and methods for using the same to relieve
pain in humans, such as pain associated with cancer, bone injuries, old age, and many other
forms of pain. Specifically, the present compositions comprise an effective amount of
acetone, a salicylate-based compound and an emollient. In addition, the present compositions
further comprise one or more compounds including, but not limited to, terpenes and essential
10 oils. The present compositions may be in the form of a liquid (preferably a slightly viscous
liquid) or other forms including, but not limited to, salves, creams, gels, ointments or sprays.
